ECAADE conference 1989 in Aarhus, Denmark  
paper: CAAD in the architectural education of the Fachhochschulen  
in the Federal Republic of Germany

abstract:

For over 10 years the author has been a teacher in the field of " computer application in architecture " at the Fachhochschule. Since 1985 he regularly has been taking part in the conferences of A.I.I.D.A. Arbeitskreis (INFORMATIK IN DER ARCHITEKTENAUSBILDUNG). All the faculties of architecture at the Fachhochschulen (about 40) can send their representatives of CAAD to the conferences. A.I.I.D.A. has been having 2 conferences a year since 1985. At the last conference in Wiesbaden a paper with statements of A.I.I.D.A. for the further education in CAAD was finished. The author presents and explains this paper. On the other hand he shows the actual education program of CAAD of his faculty. The education in CAAD started in 1972 with basic information without practical elements. Now the practical work with the workstation is taking most of the time. The computer application is available for subjects like building economics, building and structure design and others. With his assistant, the author developed programs of the field of building economics. In 1986 he started to introduce CAD with AutoCAD in the education program. Now also other colleagues start to integrate CAAD into their subjects.

Lüneburg, 08. 04. 1989
